Our company has been successfully inspected by the FDA and our products are FDA, CE, ISO 9001, ISO 13485 certified. They are manufactured in Switzerland according to the Medical Device Directive MDD 93/42/EEC.

Untreated Periodontitis correlates with many diseases.

Zirkolith® shows less adhesion of bacterial plaque, the main reason of tissue and bone recession (Periodontitis).

It can therefore help reduce several health related issues associated with periodontitis including;

Get Zirkolith™ Implants – 100% metal-free and Hypoallergenic.

zsystems: Reconstruction of the natural pink-white esthetics, for a beautiful smile:

- Metal-free and excellent osseointegration
- Naturally white and aesthetic
- Very good soft tissue (gingival) reaction
- Highly biocompatible

Highly aesthetic: even in the case of a gum recession, no gray metal shades or traces can become visible.

zsystems – the safe, highly biocompatible alternative to titanium dental implants.
